DIARY NOTES

25X1A

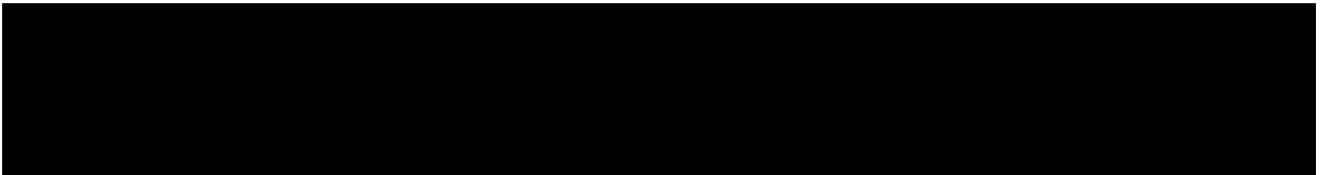

DD/A

8 December 1954

1. Jim Garrison and others from the Logistics Office briefed me on a proposed agenda for the first meeting of the steering committee working on the development of plans for a permanent headquarters building. H

3. I also talked to the Bureau of the Budget representatives about a request that we supply them with a dollar figure which would represent the original cost of fixed communications or point to point transmission equipment where the signal is directed overseas. After some discussion I agreed to furnish them with a dollar figure without any identification.

25X1A6a

4. Attended a Project Review Committee Meeting at which one project for consideration had to do with dehumidified storage space for communications equipment. Since the Office of Communications indicated that they planned to use all of this space for communications equipment, the question arose as to whether there was a need for additional dehumidified storage space and the Deputy Director (Administration) was asked to determine this. I have placed this requirement on the Logistics Office.
